

HORSE CREEK AREA WATERSHED COUNCIL
CONSERVATION INCENTIVES 2023

Please check the incentive(s) you are interested in. Incentives only apply to land within the watershed. You may sign up for more than one. Funding is limited and will be first-come, first-served. We reserve the right to pro-rate payment amounts if sign-up exceeds funding availability. **Deadline for sign-up is June 1st.** For soil sample incentives, a record of sampling and analysis must be submitted by December 1. Payments will be made by December 31. Payments for incentives will be administered by the Polk County Land and Water Resources Department staff.

Please return in the enclosed envelope or mail to:

Horse Creek Area Watershed Council, c/o Brad Johnson, 480 200th St., Osceola, WI 54020

___ **\$4/acre for new soil samples**, taken in 5-acre increments or less, and review. You may take the samples yourself or use a consultant. You must provide proof of sampling and analysis to receive the incentive and must be willing to share your sample results with the council. *Note - The data will not be made public, but you may be asked to complete a short survey quantifying any fertilizer reductions or nutrient management plan efforts implemented as a result of this incentive.*

Please indicate the number of acres you would like to sample for incentive payments - _____ acres

___ **\$1/acre payment for phosphorus indexing.** The phosphorus index is a number that indicates the potential for phosphorus loss from a field. It is calculated using soil sample results and other factors including distance to a water body, slope, soil type, tillage practices, etc. If you already have a nutrient management plan for your operation and you are actively updating this plan you would be eligible for this incentive.

Please indicate how many acres you have covered under a 590 approved nutrient management plan - _____ acres

___ **\$20/acre for planting a fall seeded cover crop** in a growing crop or following the crop harvest (**maximum 150 acres**). Cover crops may include any species of small grain (winter rye is recommended). Multi-species mixes are eligible. Cover crop must be planted in a growing crop or after the harvest of the crop but no later than October 15th. Cover crop must be fall or spring terminated. Priority will be given to first time participants. Incentives for cover crop planting may be pro-rated according to available funding. Watershed council members can provide guidance in cover crop establishment. Council contact information can be found on the reverse side.

Please indicate how many cover crop acres you are planning to plant within the watershed area - _____ acres

___ **\$80 stipend for well water testing.** This one-time stipend is made available to applicants looking to learn more about their well water quality by taking a well water test. Applicants will receive a well water test kit and following lab results will have access to information to help interpret their results. The test result data will not be made public. Applicants will be contacted by the Polk County Land and Water Resources Department staff to provide sample instructions and kits. Lab analysis must be presented as proof of payment to be eligible for the well water testing stipend.

___ **\$250 stipend for streambank stabilization and improvement consultation - NEW!** This incentive applies to landowners who own land adjacent to Horse Creek or its tributaries and have concerns with streambank erosion or stability on their property. A \$250 stipend is available to landowners who schedule and complete an on-site consultation with a conservation professional from the Land and Water Resources Department. Conservation staff will contact you and schedule an on-site consultation to evaluate the area(s) of concern. This will include the streambank area and potentially areas adjacent to the stream. Staff will provide options for repair and discuss potential cost share funding sources.

Note – Participants will be encouraged but not required to complete suggested streambank repairs or install conservation practices to receive the stipend.

Incentive Practice Write-In - NEW! Please share your ideas or needs for additional conservation practices that could be incentivized through this program. Upon review by the council, write-ins will be evaluated and possibly incentivized in 2023.

INCENTIVE PROGRAM FUNDING APPLICANT INFORMATION AND ELIGIBILITY SELF CERTIFICATION

Please provide the following information to be eligible for 2023 conservation incentives.

Name _____ Address _____ Phone _____

NEW DATCP REQUIRED PROVISION: *I certify that I have not received incentives for the same practice or installed conservation practices on fields or acreage where I have received incentives for more than a total of three years. I understand that if I have received 3 years of incentive payments for the same practice on the same acreage, I may not be eligible for 2023 conservation incentives on those acres.*
